

IPAFIX

Substitute for Isopropyl alcohol

Key Characteristics

- Dosage: 3 - 5 %
- For sheetfed and heatset application
- Increases water transport in the dampening unit

Features and Benefits

Low consumption

- In average 60% less than current dosage
- Reduces VOC-emissions

Universal in use

- Compatible with all fountain solutions

Instructions for use

Dosage: approx. 40% off the dosage of Isopropylalcohol. Ipafix can be dosed by the standard IPA-dosing device.

Transport & Storage

Protect against extreme weather conditions.

Do not store at temperature above 35 °C or below -10 °C.

Take all necessary precautions to avoid environmental pollution due to accidental leakage.
